

THE ART OF CONCRETE

# CREATING A STRONGER FUTURE

Our team brings **years of experience in decorative concrete** and we offer unmatched **attention to detail.**

# ABOUT US

In 2017, we had a dream of wanting to create a new platform to give designers the chance to use concrete as a creative medium. Today, we've become an innovative decorative concrete company. Our company is young, but our team members have years of experience in the industry. Our owner and president, Karen Keyes, has concrete in her family tree with a grandfather who started his own concrete business in 1947.

With years of experience and an innovative process for perfecting decorative concrete, The Art of Concrete brings creativity and originality to commercial construction. We're ready to dream with you and help discover the right art and innovation for your concrete. To learn more about the options we offer and the possibilities for your concrete surfaces, contact us today.

***We had a really good experience.** They worked with us to get things done a little bit sooner. Came when they said they were going to. They were on top of their pricing for any changes."*

–Elizabeth Erling | Mortenson Construction

# CREATING A NEW CANVAS

Decorative concrete is a simple term that encompasses a lot of different possible categories. There are no limits to what we can accomplish for you. There's no reason to settle for concrete that looks like everything else anymore. You can add unique character to your concrete just by adding highlights, stains, or color hardeners.

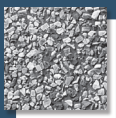

We're here to help you find the appearance that fits your aesthetic preferences. Not looking for colors or highlights? Even standard gray concrete has the aptitude to be artful in the right hands. We can use creative forming and finishing to give your surfaces that extra touch of flavor. Let's work together to create something uniquely stunning that will endure into the future.

## SURFACES WE WORK WITH

- ▶ Sidewalks
- ▶ Walls
- ▶ Plazas
- ▶ Pool Decks
- ▶ Custom Concrete
- ▶ Streetscapes

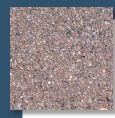

## SERVICES WE OFFER

### EXPOSED AGGREGATE

Colors and textures can be brought out of concrete with carefully crafted exposed aggregate.

### COLORED CONCRETE

Adding color to concrete is a simple yet effective way to change the tone of your concrete surfaces.

### CUSTOM FINISHES

When new concrete isn't an option, a custom finish is a flexible way to add flair or texture.

### SAND FINISH CONCRETE

A sand finish gives your surface a smooth texture that is kind to bare feet and not slippery.

### STAMPED CONCRETE

This offers the durability of concrete designed to look like stone, brick, slate, tile or even wood.
